To Whom It May Concern

## UK & EU REACH

In accordance to article 33 of the REACH regulations, any supplier of an article containing a substance on the candidate list in a concentration above 0.1% (w/w) shall provide the recipient with sufficient information to allow safe use of the article, including as a minimum, the name of that substance.

Please be advised **only** our **K86000 Series of polyurethane protection products contain** < 1% of 2-(2H –benzotriazol-2-yl)-4,6-ditertpentylphenol (Cas: 25973-55-1), which is currently on the candidate list for Substance of Very High Concern (SVHC). *We are currently consuming remaining stock of these films until we fully switch to our K85000 Series polyurethane films, which are free of the afore named SVHC substance by 2023.*

We do not intentionally introduce any other substances that are listed on the REACH Candidate List of Substances of Very High Concern (SVHC) into other products and raw materials used within our range.

Please do not hesitate to contact us if you require further information.
